# How it is different from the conventional one ???

## What's new ???

- The size is compact.
- The passage of air is vertical as compared to sideways or diagonal as compared to the conventional one.
- Thereby, solves the problem of restriction of vision.
- Charcoal is used as adsorbant for particulates.
- Cost is much less.
- Additional eye gear is used instead of plastic/fibre shields.
- Cost->Rs. 650

Leads to  
restricted  
vision
